Hi Tracy – can you look at this blurb I wrote in response to Billy’s email below? I’m not sure how much detail about the health risks I should include. The one pager is in the folder on the G drive so that’s taken care of.

Subject: DRA Summary, DRA FR, and the Action Information Sheet

All,

I know the DRA summary one pagers are not done for esfenvalerate, acephate, and carbaryl. Assuming all of these still made it into the Q2 FR, I have been working to update the action information sheet for this FR with a few sentences on each chemical. Below you can see what I came up with so can you all please send me something similar for esfenvalerate, acephate, and carbaryl asap? We would like to get the sheet over to RCS and then OP relatively quickly. This is a new and evolving process so we will see how it goes but we are trying to be proactive to OP's needs.
